

AIR ACTIVITIES STAGE 1 AND 2 BADGES – 'GAP-FILL' ACTIVITIES

Make an aircraft out of paper and see how well it flies. You could try flying it into a bucket or through a hoop.

Talk to someone who's flown in an aircraft and write down what they said. If you've already flown in an aircraft, write about it.

Describe the dangers of an airfield.

Describe how different weather conditions can affect air activities.

Imagine (ideally by drawing a picture) what an aircraft of the future might look like in 50 years time.
