

FIRE SAFETY BADGE

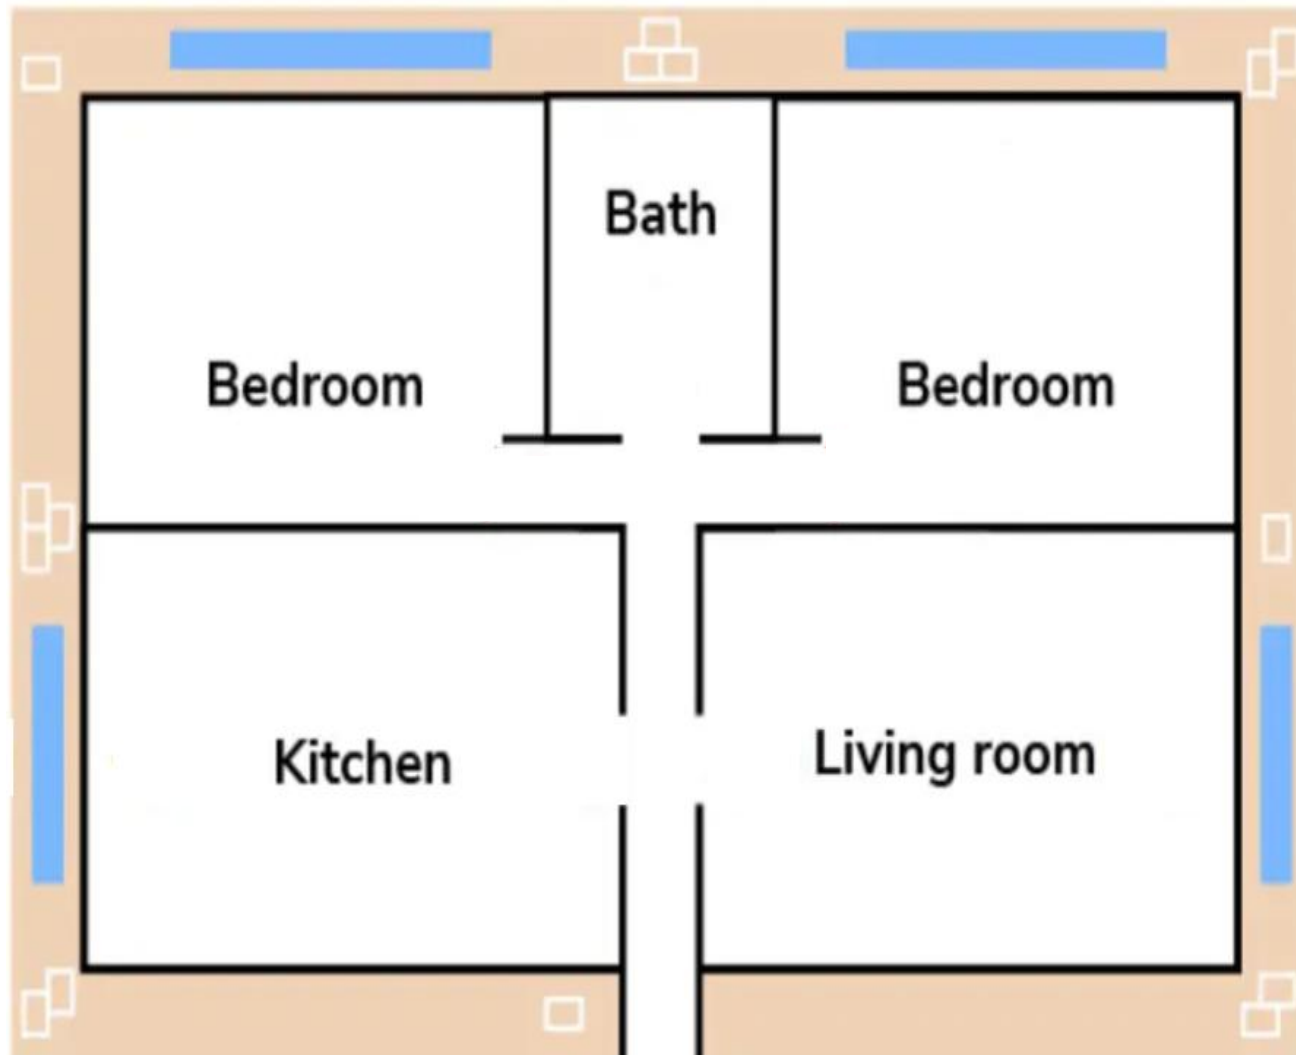

'GAP FILL' ACTIVITIES

1. Write in the box below three possible dangers in a building such as the home, Cub Hut or school that could start a fire, and what could get done to prevent this from happening?

2. Write in the box below how you should stay safe around a campfire and also how you should stay safe around fireworks.

3. On the picture below draw two escape routes with arrows which lead from each of the rooms to the tree outside the house. The Primary escape route should be the easiest and quickest and the Secondary escape route, to be drawn with arrows in a different colour, will be used if the Primary route is blocked. The blue items shown on the picture are windows.

Meet here!
